Profile

Full-Stack Developer with 3+ years of experience building and shipping production-ready web applications using Next.js, React, TypeScript, Nest.js, Node.js, and PostgreSQL. Experienced in designing scalable frontend interfaces, backend systems, REST APIs, payment integrations, subscription platforms, and CMS-driven workflows. Strong problem-solving and debugging skills, with experience mentoring junior developers.

Technical Skills

- **Frontend** : JavaScript, React.js, Next.js, TypeScript, Tailwind CSS, Shadcn UI, Radix UI, Hero UI, Semantic UI, Chakra UI
- **Backend**: Node.js, NestJS, REST API Design, Authentication Authorization, OAuth 2.0
- **Database & Caching**: PostgreSQL, SQL, MongoDB, Prisma ORM, Redis
- **State Management**: Redux Toolkit, TanStack Query, Context API, Zod
- **Performance & Build**: Code Splitting, Lazy Loading, Bundle Optimisation, Webpack, Babel, Vite
- **Testing**: Jest, React Testing Library (RTL), Cypress (working knowledge)
- **Version Control & CI/CD**: Git, GitHub (PRs, branching, code review), NPM package publishing
- **Content & Data**: Strapi CMS, Firebase
- **Accessibility & Design**: WCAG accessibility standards, Responsive Design, Mobile-first layouts

Professional Experience

Frontend Engineer ([Zeta Labs](#))

Kuleswor, Kathmandu 09/2024 - present

- Architected and delivered a complex mono-platform web application using React, TypeScript, Tailwind CSS, and Shadcn UI, collaborating with backend engineers to shape REST API contracts for optimal UX.
- Built the company's public portfolio with Next.js, TypeScript, and Tailwind CSS, integrating an SMTP mail service — shipped
- Developed a resource-access web application using React, TanStack Query (React Query), Hero UI, and TypeScript; implemented code splitting and lazy loading to reduce initial bundle size.
- Partnered with backend and frontend engineers in structured brainstorming sessions to define scalable architecture patterns and enforce component consistency across the platform.
- Integrated payment gateways (Stripe, eSewa) covering general bookings, subscription billing and membership renewal flows.
- Developed the Clinic Management System for end-to-end patient flow — reception intake, doctor consultations, department routing, lab orders, and result reporting.
- Built a separate Pharmacy Management System, allowing pharmacist user to manage the medicine inventory, make sales, track purchases and the stocks.
- Mentored junior developers through code reviews and best practices, improving code quality and delivery speed.

Frontend Developer ([Corpola Tech](#))

Sankhamul, Lalitpur 04/2023 - 10/2024

- Designed and implemented a Learning Management System (LMS) using React, Semantic UI, and Context API — enabling instructors to author lessons and learners to track progress
- Built an e-commerce platform with an admin dashboard using React, Tailwind CSS, Semantic UI, and Redux for global state management.
- Authored and published a custom NPM package providing reusable e-commerce layout components, improving team development speed and code reusability.
- Developed a cross-platform mobile application with a user-friendly, accessible UI/UX, ensuring responsive design across all device sizes with minimal platform-specific adjustments.

Notable Projects & Open Source

NPM Package — Reusable E-Commerce Layout Components [npmjs.com](#) | **React** | **NPM** *Open Source*

- Designed, built, and published an open-source NPM package providing plug-and-play e-commerce layout components for React projects.
- Adopted internally at Corpola Tech to standardise UI patterns and reduce boilerplate across multiple product teams.

Learning Management System **React** | **Context API** *Personal Project*

- End-to-end LMS built with React and Context API, supporting lesson authoring, learner enrolment, and progress tracking.
- Designed with a scalable, modular component architecture to accommodate future course-type extensions.

AI Portfolio Generator | [Live Demo](#) **Next.js** | **NestJS** | **PostgreSQL** *Personal Project*

- Built a full-stack SaaS application (Next.js, NestJS, PostgreSQL, Prisma ORM, Redis, TypeScript, OpenAI/Groq, Tailwind CSS) that converts a developer's GitHub profile or resume into a professional portfolio within minutes.
- Developed end-to-end features including authentication, AI content generation, analytics, file uploads, email workflows, and a drag-and-drop editor.
- Engineered the full user journey — from onboarding and AI generation to publishing, sharing, and portfolio view tracking.
- Integrated AI to transform GitHub activity and resumes into recruiter-friendly portfolio content, saving 20+ hours per user.
- Implemented OAuth authentication with GitHub and Google, reducing sign-up friction and improving landing-page-to-active-user conversion.
- Built a flexible template and section system enabling users to customise layout, content, and styling without writing code.
- Implemented auto-sync with GitHub, along with versioning and revert functionality to manage portfolio updates efficiently.
